LibroSphere

AI – Enhanced E – Library System

Overview

LibroSphere is a modern e-library system designed to provide a personalized, interactive, and accessible digital reading experience by leveraging artificial intelligence technologies.

Objectives

- Enhance User Experience through Personalization
- Improve Accessibility
- Streamline Content Interaction
- Implement Advanced Search Capabilities
- Ensure Scalability and Flexibility

Key Features

- AI-Powered Mood-Based Recommendations
- Audio Summarization (TTS)
- Semantic Search Engine
- Interactive Book Summaries
- Admin Dashboard

Future Work

- AI Chatbot Integration
- Augmented Reality (AR) Features
- Enhanced Multilingual Support
- Mobile Application Development

Welcome to LibroSphere
Enjoy the life with books
